

## **Frequently Asked Questions regarding Adventium Labs support of the Joint Multi-Role Technology Demonstrator (JMR TD) Mission Systems Architecture Demonstration (MSAD) Capstone Demonstration (BAA W911W6-18-R-0006) and related solicitations.**

**08 March 2018**

**Overview:** This FAQ provides information for those Offeror's wishing to include the CAMET Library in their proposals to the U.S. Government.

**Proposal preparation:** Non-Sponsors may include CAMET Library in their proposals by using information on this website and other public information. CAMET Library Sponsors may additionally use information and materials found on the CAMET Library in preparing their proposals.

**CAMET Library Sponsorship:** Adventium's CAMET Library tools and related information are only available to CAMET Library sponsors. For sponsorship pricing information, please see <https://www.adventiumlabs.com/content/camet-access-request>

**Non-Disclosure Agreements:** During the proposal period, Adventium Labs will not enter into non-disclosure agreements related (directly or indirectly) to the solicitation with potential Offerors to avoid any potential or appearance of procurement conflicts.

**Training Support:** Adventium Labs is available to support Offerors selected by the Government in the use of Adventium's CAMET Library tools, including applying our modeling and AADL expertise to the Offeror's specific effort. To include Adventium Labs support in a proposal, two options are available:

- 1) Generic support in firm fixed price 40 hour increments for \$8000 per increment (plus the annual sponsorship fee). Travel is not included.
- 2) Custom support for a specific scope of work. Please send an email to [camet-library@adventiumlabs.com](mailto:camet-library@adventiumlabs.com) with a non-proprietary description of the effort, your affiliation, and contact information to start the discussion. Please remember the guidance on NDAs above.

For background information and training on AADL, please see the resources listed in Additional Resources at the bottom of [www.camet-library.com](http://www.camet-library.com).

**Support Example:** As a specific example of the support envisioned: Offeror engineers use OSATE and CAMET tools to convert Project models to AADL, run CAMET analysis tools, and generate reports (reference examples are included with CAMET). With added support, Adventium supports Offeror engineers' use of CAMET tools (answer questions, training on how to use tools). Adventium engineers do not work directly with Project models.

**Additional Information:** If you require information for your proposal that is not available here, please send a non-proprietary email to [camet-library@adventiumlabs.com](mailto:camet-library@adventiumlabs.com) describing the additional information. We will publish the responses on this FAQ site.
